

AMERICAN DTF CURE BOX

Made in the USA DTF Equipment

The American DTF Cure Box is perfect for melting and drying DTF powder on all different sized films, up to 16" x 20". This DTF Curing Oven is engineered, manufactured and supported in the USA. Do not sacrifice quality or safety with a foreign import. Get a product Made in America.

Featuring a digital controller, easily set the precise temperature and time for consistent results. The DTF powder melts nearly instantly to produce films in about 1 minute. An alarm signal sounds after curing, alerting you to remove the transfer film.

A great alternative to using a heat press, the American DTF Cure Box is fast and efficient. By using the Cure Box for powder melting, your heat press remains open for other uses.
