AEOON KYO PRINTER

The Kyo direct-to-garment printing system by Aeoon Technologies provides new design possibilities with high-speed, high resolution printing. With cycle speeds of up to 33 dozen A4 size prints per hour, it was designed for high volume industrial production with high print quality. It combines the speed and production costs that closely match traditional screen printing with the numerous advantages of digital printing.

AEOON COMPACT PRINTER

The Aeoon Compact Series was designed to include the best of direct-to-garment printing within a slim shape. Featuring a smaller and elegant design, this machine meets the requirements of businesses with limited space availability. It is as fast and delivers equally pin-sharp quality prints as its counterpart Aeoon Kyo Series. Reach printing speeds of up to 950 t-shirts per hour.

EPSON SURECOLOR F2100 SERIES

Designed exclusively for direct-to-garment printing, the SureColor F2100 offers an entirely purpose-built system for high-quality prints at production speeds. Developed using the latest advancements in performance imaging, including Epson PrecisionCore TFP printhead and Epson UltraChrome DG garment ink technology, the SureColor F2100 achieves up to twice the speeds of their previous generation of DTG printers. Additional improvements — like a quick-load platen and robust Epson Garment Creator Software — take productivity even further, while the all-new integrated self-cleaning system means less downtime.

AEOON PTB PRETREATMENT SERIES

Pre-treat up to 350-400 t-shirts per hour with the Aeoon PTB. The correct pre-treatment is an essential step of the digital direct-to-garment printing process. This high-speed pre-treater finally gives you a solution to keep up with the extremely high-speed of the Aeoon DTG printers. Aeoon has integrated many features to ease the process, save costs as well as reduce cleaning and maintenance to a minimum.

M&R EZPREP PRE-TREATMENT SYSTEM

EZPrep automatically pre-treats garments for use in direct-to-garment digital printing. EZPrep is designed to maximize print consistency, minimize overspray and eliminate guesswork from the pre-treatment process. Its consistent application of pre-treatment solution can reduce overall consumption, speed up production and decrease costs.

Lawson Silver Jet

Lawson Zoom AE

LAWSON PRE-TREAT SPRAYERS

Lawson pre-treat sprayers come in a variety of options to suit all needs. Their all electric, industrial, state-of-the-art build is ideal for basic to sophisticated spraying. All feature an instant twist on/off spray nozzle that also allows for adjustable spray lengths. Compact and economical options suit various budgets and space constraints. Lawson pre-treat sprayers are consistent and fast, ensuring each job is done right.

VIPER XPT1000 PRE-TREATMENT MACHINE

Viper XPT1000 is a unique and easy to use pre-treatment machine that is efficient and at a price that is affordable for every DTG shop.

PRE-TREAT SOLUTIONS

Crisp images and bright colors all begin with the right pre-treat solution on your garment. Nazdar SourceOne is proud to offer a wide selection of OEM pre-treat solutions.

HEAT PRESSES

DRYERS

AEON INDUSTRIAL PNEUMATIC MEMBRANE HEAT PRESS

Aeoon's first heat press features two platens with many standard and custom sizes. Space between the platen and heat plate can be adjusted to meet space requirements. This heat press has many user friendly features including automated temperature control and digital time counter.

STAHL'S HOTRONIX® HEAT PRESSES

Hotronix heat presses feature the world's most innovative technology. Featuring auto-open and over-the-center pressure adjustment. All machines are made in the USA.

Stahls' Hotronix Dual Air Fusion

AIR FUSION

For high-volume operations

DUAL AIR FUSION

Two stations increase productivity

FUSION

Swinger and draw press in one

HOVER PRESS

Perfect for curing DTG inks

M&R GAS & ELECTRIC DRYERS

M&R offers a strong selection of gas and electric conveyor dryers. In keeping up with industry demands, M&R has built these dryers with the operator in mind, offering features like large color touchscreen control center, heavy-duty thermal insulation, Coolskin™ technology and the Patriot Belt™ which rides on SureTrak™ rollers. The dryers boast high production levels plus they are most energy efficiency in their class.

M&R SPRINT 3000T

The most innovative gas conveyor dryer in the industry

INSTA GRAPHIC SYSTEMS INSTA 158

The Insta 158 Digital Auto Release Digi-Press® offers one of the major benefits of an automatic machine - the auto-open feature - with the lightweight, ergonomic design of a manual clamshell heat press. The Insta 158 meets the demands of today's busy retail environment and is also a practical solution to use as a pre- and post-curing agent for the expanding digital direct-to-garment marketplace.

INSTA GRAPHIC SYSTEMS INSTA 728

The Insta 728 is an Automatic Swing heat press with a 15" x 20" platen. This machine is a work-horse and renowned for being one of the most reliable and durable heat presses available. Since it is a pneumatic heat transfer machine, its air-driven operation prevents operator fatigue and promotes consistent production speed. The Insta 728 is used globally by contractors for many of the world's leading clothing brands because of its fast recovery, accurate temperature, even pressure and its ability to generate consistent results under 24/7 use.

BBC AEOLUS ELECTRIC DRYER

With the ability to cure plastisol, water based and direct-to-garment inks, the BBC Aeolus can do it all. BBC's Edgemax™ technology gives you the highest quality, fastest cure and most consistent edge-to-edge temperatures. All while avoiding downtime with TruTrak™, the most dependable, often imitated, belt tracking system.

NAZDAR SOURCEONE CORPORATE HEADQUARTERS SHAWNEE, KANSAS

ABOUT NAZDAR SOURCEONE

Nazdar SourceOne is the leading supplier of screen and digital printing equipment, inks and supplies. We maintain relationships with the world's foremost manufacturers, providing best-in-class technology and quality to specialty graphic printers in the United States, Mexico and Central America. With a network of 15 locations, we deliver localized inventory, superior customer service and expert technical support to the graphic, textile and industrial markets.
