Eco-Strip®C

Super Concentrated Emulsion Remover

GENERAL DESCRIPTION

Eco-Strip®C is designed for removal of all photopolymer, diazo, and capillary film emulsions. Eco-Strip®C will immediately liquify and break down the emulsion. Dramatically increase the speed of the reclaim procedure.

ADVANTAGES

- Economical
- Easy to use
- Immediately breaks down emulsion
- Low Odor
- Safe on all types of mesh
- Non-Hazardous (after dilution)
- Biodegradable / Drain Safe
- Super Concentrated
- Ideal for use in all Automated Reclaiming Systems (will not crystallize, coagulate, or plug nozzles)
- Ideal for use in dip tank applications

Quick Tip:

Use a dilution that has plenty strength to break down the emulsion.

Emulsions, that are not properly broken down, will leave excessive residue on the mesh.

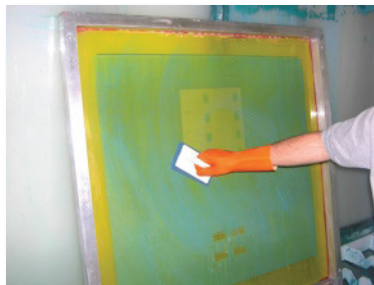

Application

Eco-Strip®C must be diluted with water before use, dilute up to 1:50 water.

Eco-Strip®C can be applied by a sponge, pad, spray bottle, dip tank, or pneumatic pump systems.

Step 1. After removal of ink, block-out, and tape, apply Eco-Strip®C to a wet screen (both sides).

Step 2. Scrub screen with non-abrasive pad or brush.

Step 3. High pressure rinse - starting at bottom.
