**Danger:** Flammable liquid and vapor. Irritant. Harmful to the environment. Causes skin irritation. May cause dizziness or other respiratory effects. May cause an allergic reaction. May be fatal if swallowed and enters airways. Avoid contact with skin, clothing, and eyes. Avoid breathing vapors. Wash thoroughly with soap and water after use. Do not get into eyes. If contact with eyes occurs, flush thoroughly with copious amounts of water. If contact with skin occurs, wash thoroughly with soap and water. If contact with clothing occurs, remove clothing immediately. Rinse skin immediately with plenty of water. For more information, see SDS. Do not eat, drink, or use tobacco products while using this product. Keep this product and its container away from children and pets. Do not use near open flames or other heat sources. Use only in well-ventilated areas. Do not mix with other chemicals. Do not discharge into the environment. Do not pour down drain. Use only as directed. Do not use in confined spaces. Do not use in areas where fire, explosion, or other hazards are present. Do not use in areas where it may create a slip, trip, or fall hazard. Do not use in areas where it may create a respiratory hazard. Do not use in areas where it may create a health hazard. Do not use in areas where it may create an environmental hazard. Do not use in areas where it may create a safety hazard. Do not use in areas where it may create a liability hazard. Do not use in areas where it may create a reputation hazard. Do not use in areas where it may create a financial hazard. Do not use in areas where it may create a legal hazard. Do not use in areas where it may create a regulatory hazard. Do not use in areas where it may create a compliance hazard. Do not use in areas where it may create a risk management hazard. Do not use in areas where it may create a sustainability hazard. Do not use in areas where it may create a stakeholder hazard. Do not use in areas where it may create a strategic hazard. Do not use in areas where it may create a tactical hazard. Do not use in areas where it may create an operational hazard. Do not use in areas where it may create a process hazard. Do not use in areas where it may create a system hazard. Do not use in areas where it may create a component hazard. Do not use in areas where it may create a subcomponent hazard. Do not use in areas where it may create a part hazard. Do not use in areas where it may create a material hazard. Do not use in areas where it may create a component hazard. Do not use in areas where it may create a subcomponent hazard. Do not use in areas where it may create a part hazard. Do not use in areas where it may create a material hazard.

## CHEMISTRY & EMULSION

---

The ImageStar ProTex line of screen printing chemistry and emulsion is specifically designed for the challenges of today's garment printing. The ProTex line includes nine different products, each designed to improve the quality of the print and the efficiency of your process. From mesh prep to screen wash, ProTex has you covered.

ImageStar Protex is available exclusively from Nazdar SourceOne and sourced from leading manufacturers globally. ImageStar brand products are made to our specifications and maintain the perfect blend of performance, quality and price.

## MESH PREP

## MESH PREP

ImageStar ProTex Mesh Prep prepares new mesh for stencil making.

### HIGHLIGHTS

- 10:1 concentrated liquid wetting agent and degreaser (use IMS ProTex Mesh Prep with Abrader for new mesh)
- Non-hazardous
- Includes adhesion promoter
- Improves coating and resolution

### ITEM NO.

### SPECS

### PRICE

IMSPT1024OZ	4 Ounce	\$14.52
IMSPT10203	Quart	\$28.33
IMSPT10204	Gallon	\$101.67
IMSPT10205	5 Gallon	\$409.12

## MESH PREP WITH ABRADER

### HIGHLIGHTS

- Ready-to-use gel
- Abrades and degreases with an added adhesion promoter
- Does not clog mesh openings

## EMULSION/PRESSWASH

## SBQ BLUE EMULSION AND DIAZO

ImageStar ProTex SBQ Blue Emulsion and Diazo is an all-purpose, high quality textile SBQ emulsion for waterbase, discharge, plastisol and silicone inks.

### HIGHLIGHTS

- One part emulsion, high solids (43%)
- Exposes 7x faster than a Diazo Dual Cure
- Rapid image washout
- Long shelf life at 2 years (without addition of optional diazo)
- Can expose when emulsion is dry to touch
- Optional diazo addition will improve fine detail and limit shelf life to 4-6 weeks

## PRESSWASH

ImageStar ProTex Presswash was designed to remove plastisol and silicone inks from screens on press and works well to remove adhesives from platens.

### HIGHLIGHTS

- Works on all plastisol and silicone textile inks (not for waterbased inks)
- Low odor
- Fast drying when wiped with 100% cotton, leaves no residue.
- Can be used for recirculation applications
- Lifts adhesives off of platens

## INK/EMULSION REMOVER

## INK REMOVER

ImageStar ProTex Ink Remover is the perfect solution for removing solvent, UV and textile inks from screen.

### HIGHLIGHTS

- Can be used from container or diluted with water
- Can be diluted up to 50/50 with water for screen cleaning (plastisol and silicone ink) or diluted up to 80/20 with water for screen cleaning (waterbased textile inks)
- Completely mixes with water; no separation
- Works in automatic machines
