A Bemis Company

IMAGin® ROODLE™ RO628

Take wall murals, posters, decals and more to the edge with new pressure sensitive adhesive.

What is IMAGin ROODLE RO628?

IMAGin ROODLE RO628 is a 6.0-mil matte white, semi-rigid calendered PVC film with a removable acrylic adhesive. As an addition to the IMAGin line of wide-format digital media, it is designed to be an easy to apply and easy to remove product for a variety of applications. Because it can be tiled, ROODLE is ideal for multiple panel installations.

Product	Gauge	Adhesive	Liner	Min. Application Temperature	Outdoor Durability
RO628	6.0-mil	Removable Acrylic	90# SuperFlat™	50°F (10°C)	Up to Three Years

IMAGin ROODLE RO628 features a thick, robust facestock that eliminates the need for a laminate for handling and a moisture stable 90# SuperFlat™ polyethylene-coated kraft liner for smooth printing. This easy-to-use media is ideal for wall murals, posters, point-of-purchase (POP) displays, removable decals and other large graphics on smooth, flat surfaces. ROODLE can be printed to the edge with eco-solvent, solvent, latex and UV wide format inks; solvent and UV screen printed; and UV offset printed.

MACTac® TAKES YOU THERE.
