

The new **TrueVIS** VG series printer/cutters

COMPLETELY REIMAGINED

 **Roland**

Vibrant Images and Brilliant Results

Everything about the way the TrueVIS produces images has been perfected. Four newly developed FlexFire™ print heads deliver a high firing frequency and precision droplet placement in three sizes, with a wide print swath. The result: every drop of ink falls exactly where it is intended, delivering beautiful images and uniform colors at production speeds on a wide variety of materials.

Maximum Ink Quality at Minimal Cost

All new TrueVIS INK is a major step forward in eco-solvent technology, delivering exceptional color while meeting improved environmental standards. Virtually odorless and GREENGUARD Gold certified for low VOC's, the brilliant new ink system features cost-effective 500ml pouches that fit neatly into reusable cartridges and slide into a hidden ink bay for clean usage with less waste. To give users both maximum productivity and enhanced output, TrueVIS INK is available in configurations that include 4-color, 7-color or 8-color.

New Cutting Technology Improves Accuracy and Saves Time

Roland DG started with cutting and we haven't stopped since. The TrueVIS features our most advanced print/cut technology to date. A new, improved cutting carriage, blade and blade holder offer increased down force and accuracy allowing you to work with a wider variety of media.

Smart Tech that Communicates with Your Tech

The new wireless Roland DG MobilePanel allows you to perform control panel functions of the VG series with your existing smartphone (iOS or Android operating systems) using a Bluetooth connection. This innovative new feature provides a rich interface directly on, or remotely in range of your TrueVIS, so you can test print and perform cleaning functions and maintenance procedures. Very smart.

New VersaWorks® Dual RIP Included

Roland DG's RIP software, VersaWorks Dual – free with the VG series – features a new core engine for better file processing, including native PDFs and files with transparencies, plus the advanced and ease-of-use capabilities that VersaWorks is known for.

To learn more about the advanced capabilities of the VG series, view the video at www.rolanddga.com/vg.

Wall graphics

With the productivity features of the VG series, large wall wraps, signs and graphics become effortless.

Car Wraps

Print and cut car wraps, window graphics and large sticker projects fast and efficiently with the VG series versatile features.

Bring your vision to life.

With new TrueVIS VG series 64" and 54" printer/cutters, we reimagined everything. First, we started with your end results in mind. Dynamic decals. Striking signs. Vibrant vehicle graphics. Because we know you need to be able to produce it all – on demand.

Then we made the TrueVIS more efficient and productive than ever. New FlexFire print heads that produce dots with high frequency and precision. New inks that are more cost-effective. New cutting that increases accuracy. And new tech to communicate with your phones and tablets.

The future of print/cut has arrived.

New TrueVIS INK

Vibrant, fast-drying inks in cost-effective, 500ml pouches with reusable cartridges

Four New FlexFire™ Print Heads

High firing frequency of precision droplets in 3 sizes and a wide print swath, for exceptional output

New Cutter

Increased down force and accuracy

New Roland DG MobilePanel

Access control panel functions using your existing smartphone or tablet

4-Color, 7-Color or 8-Color

Vibrant colors and stunning detail in CMYK, CMYKLcLmLk or CMYKLcLmLk+W

Integrated Contour Cutting

Maximize versatility with print and contour cut

TrueVIS

VG series

Highlights & Specifications

- Printer plus integrated contour cutter available in 64-inch and 54-inch models
- New GREENGUARD Gold certified TrueVIS INK comes in cost effective, 500ml pouches with reusable cartridges
- Four new FlexFire™ printheads fire precision droplet patterns with maximum speed, quality and efficiency
- New Bluetooth-enabled Roland DG MobilePanel allows for smartphone or tablet control panel operation
- New cutting technology for increased down force and media compatibility
- Illuminated and colored LED lights signal status of the machine
- Included take-up unit boosts performance during long production runs and optional dryer unit available
- Available in 4-color, 7-color and 8-color. Ink options include CMYK, Light Cyan, Light Magenta, Light Black and White
- Maximum resolution: 900 dpi
- Maximum speed: 375 sqft/hr. Production speed: 153 sqft/hr. (dual CMYK, 6-pass)
- Motor and drive systems provide excellent durability for lasting, high-volume production
- Included new VersaWorks Dual RIP software for improved file processing in a simple, yet advanced interface
