State-of-the-Art Ink Printing with ECO-UV® and V-BOND Inks

Direct print onto hundreds of different surfaces with the power of VersaUV and VersaOBJECT technology and ECO-UV® or V-BOND inks—engineered for use on all applications they provide ultra-brilliant color results.

Print gloss/matte finishes, realistic textures, or 3D embossed effects to add another dimension of "touch and color."

For use with LEF2 flatbeds, Prop 65 and CPSIA compliant V-BOND inks have low VOCs, and are safe-to-use on toys, pet supplies, and other popular products.

Select VersaUV models include additional White ink and Primer ink for prepping glass, acrylic and other impervious media.
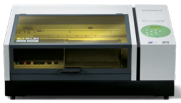

ECO-UV® inks are engineered for use on all applications—you don't need to purchase multiple ink sets for different media use.

VersaUV® LEF-12i
UV Desktop Flatbed Printer

Model	Flatbed Size
LEF-12i	**12"**

- Compact UV flatbed for quick personalization of specialty items
- Add special finishes, realistic textures, or 3D embossed effects to add a new dimension of "touch and color" with Gloss and White inks

Optional Rotary Rack Attachments

Expand your capabilities with the Rotary Rack attachments. These accessories will enhance the versatility and productivity for users by making it easier and more effective than ever to print on cylindrical objects. Available in sizes for VersaUV LEF UV flatbed printers, and for VersaOBJECT CO Series and VersaUV LEC2 S-Series printers— the Rotary Rack XL and Rotary Rack XXL.

VersaWorks

Included VersaWorks 6 RIP Software

Effortlessly manage your print output with the latest edition of the world's most popular RIP software. In addition to improved speed and file handling, it offers the following benefits:

- A Special Color Plate Generation feature for automatically generating White, Gloss and Primer layers directly in the RIP
- New color matching features for printing, scanning and transferring color values to matching Roland DG devices
- Cropping, tiling, nesting, extensive color libraries and other popular features
