

ON-COLOR, ON-BRAND AND *OFF-THE-CHARTS*

Take your color completely off-the-chart with our richest and most vivid TrueVIS color output yet that allows you to perfectly target specific brand colors and produce high-end graphics with exceptional close-up detail.

POP Displays, Signs, and Promotions

Produce signs and displays with close-up details and color to meet the exact standards of your clients.

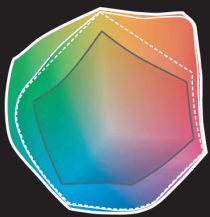

Fine Art and Photography

Get high-end, photorealistic results on gallery art, photography projects, and other fine art applications.

Vehicle Wraps and Graphics

Create vivid graphics or perfectly recreate company colors on vehicles and other branded applications.

New Inks, New Spot Colors, and Amazing New Color Matching

While TR2 Inks in CMYK, Light Cyan, Light Magenta, Light Black, White, Orange and new Green ink configurations provide an off-the-chart color gamut, the True Rich Color 2 preset in VersaWorks 6 maximizes your printer and ink to offer a whole new landscape of color. With 260 new spot color references for Orange to Red areas and Blue to Green areas, specific targets which had been regarded as unreachable or difficult to match can now be easily achieved.

Highlights

- 3M™ MCS™ Warranty and Avery Dennison™ ICS™ Warranty Program certified for added print confidence. *
- Newly designed media clamps, pinch roller system and machine operation—improved design, job sequences, software functions, operation panel and maintenance.
- An included TUC4 take up system offers two modes for both thin films and heavier media, providing take-up stability for a smooth post process.
- Easily combine with a CAMM-1 GR series cutter for print and cut graphics—a dual-device workflow automatically recognizes printer crop marks on printed media.
- Pantone® colors can be accurately matched using the Roland Color System Library—a new Multi-Process Color Function enables use of Orange and Green inks as process colors.
- Included VersaWorks 6 Software offers new features that include improved speed and file handling, and the ability to create cut data directly in the RIP.

*The 3M™ MCS™ Warranty and Avery Dennison™ ICS Performance Guarantee covers printing onto products with standard TR2 inks.
