VersaUV LEC2 S-Series

UV Printers

MAKE MORE

CUSTOMIZE MORE AND PROFIT MORE WITH A UV PRINTER THAT DOES IT ALL

Customize signs, merchandise, packaging, displays, and so many more applications with easy-to-use, multifunctional UV flatbed and belt-driven hybrid printers that transform your business output overnight with an almost unlimited range of custom graphics possibilities.

Produce promotional giveaways, giftware, and branded merchandise—add Gloss ink effects for high-end custom finishes.

Compatible with a world of flexible media, bring your unique packaging vision to life with realistic proofs and prototypes.

Customize stunning seat covers, wall coverings, fine art, and other interior décor with speed and precision.

Choose an LEC2 S-Series Printer That Fits Your Business

The LEC2 S-Series offers machine options that reflect the products and media choices you want to print on. We offer six different configurations in all, including flatbed and belt-driven models with two different bed sizes— a 64" (W) bed size that prints on full boards and a 32" (W) bed size. All LEC2 S-Series printers can print on both rigid and flexible substrates up to 7.87 inches thick, while the space-saving belt-driven hybrid models are also capable of printing on roll substrates.

Highlights

- Extraordinary versatility in application size with the ability to print objects up to 7.87 inches in height.
- Print consistently on flat, irregular or curved objects with two intuitive distance print modes.
- Machine features include LED UV lamps, advanced vacuum options, emergency stop controls, and a separate control tower with easy-operation touch panel controls.
- Get exceptional quality UV print results with cost-effective ECO-UV (EUUV5) ink in dual CMYK or CMYK with Orange, Red, White, Gloss and Primer configurations.
- True Rich Color mode combines with new Orange and Red ink options to broaden your color gamut and enable you to target specific brand colors.
- Includes VersaWorks 6 software—packed with advanced color options and output features, such as automatically generating White, Gloss and Primer layers directly in the RIP.
