All-A-Board Lifter®

Board Transport & Loading Made Easy

The All-A-Board Lifter® reduces the risk of injury to your operators and damage to valuable rigid substrates. One operator can easily transport and lift up to 500 lbs. of 4' x 10' media. Load boards stored on skids onto the All-A-Board Lifter® in the vertical position, then maneuver them through doorways and narrow aisles right up to your flatbed printer or cutter. The top rotates and locks into a flat position to feed boards into the printer or cutter one sheet at a time.

Quickly load a 6" stack of boards.

What customers are saying:

"The All-A-Board Lifter® is like having is an extra person on the job. What a tremendous help this is - especially when our skilled staff is limited and we really need an extra hand. Since we work in such a confined space, the ability to flip the All-A-Board Lifter® vertically to move it through aisles to the printer or finishing department, then rotate it flat, makes lifting so much easier. The All-A-Board also eliminates the strain of lifting sheets from the pallet. It doubles as a transport device as well as a worktable. It's super light and moves like a dream. We need to order more!"

- Eric Berger, President, Color Reflections Philadelphia, PA

Rotate and lock top into a flat position.

Available in 5 heights (34" to 42") to fit your printers and cutters.
