PERMACOLOR® GEMINI XT™

Highly Engineered Double-Sided Mounting Film

Combining High Performance and Low Cost

What is PERMACOLOR® GEMINI XT™?

PERMACOLOR GEMINI XT is a highly engineered, yet economical mounting film with high tack, high peel adhesion and high cohesive strength for a quick strong bond to a wide variety of mounting surfaces and efficient processing through most roll laminators. The single release liner (self-wound) permits easy lamination and eliminates the need to remove a second liner in applications where that may be difficult or impossible. Manufactured on Mactac's newest state of the art coating asset, PERMACOLOR Gemini XT combines high performance and low cost. Available with a clear carrier (PP5600) or opaque carrier (PP5000).

PERMACOLOR GEMINI XT has high tack and peel adhesion as well as high cohesive strength for a quick, strong bond to a variety of mounting surfaces such as:

- Stainless steel
- Acrylic panels
- Sintra® board
- Digital film
- Digital paper
- GatorFoam®
- Foam-Cor®
- Dibond®
- Ultra® Board
- Tango®

PP5000 consists of a thin, white polypropylene film coated on both sides with an aggressive rubber-based, pressure sensitive adhesive. A white polycoated 2-side, moisture stable paper liner protects the adhesive.
