

TexPrint®TA

**Thermal Adhesive
Digital dye-sublimation print paper**

FEATURES:

Two adhesion levels, widths to 3.2 meters and roll lengths to mini-jumbo.

Flatness

High color yield

Faster across the heat-press

Waste reduction

TexPrint®TA is designed to adhere to sportswear and activewear fabrics, along with other soft surfaces prone to shrinkage and movement during image transfer. Due to the wide variety of surfactants and soil release coatings applied to modern fabrics, TexPrint®TA is offered in heavy and light adhesion. Based on the proven performance and economy of the TexPrint®UT family of dye-sub papers, TexPrint®TA offers all the positive attributes of UT, PLUS thermo-adhesion. Like UT, TexPrint®TA is not intended for use on smooth or solid-surface transfers.

CUSTOMER BENEFITS:

Get exactly the right adhesion level and put-up for your production environment with less waste, fewer roll changes and more up-time.

TexPrint®TA lays flat. Prints flat. Resists cockling even under heavy ink loads. No head strikes, no worries.

More color from less ink. More color on your fabric, less ink left on the spent print-page.

TexPrint®TA allows heat to migrate through the print sheet quicker, reducing calendar dwell times and promoting higher calendar speeds, while depositing the richest and deepest dye-gas penetration.

TexPrint®TA is available in both individually boxed or bulk-packed. Volume users can save time, labor and the planet by ordering bulk packaging. Keep your dumpsters hungry for better things.

Properties

Grade	GSM	Applications
TexPrint®TA/H	92 gsm basis weight	"Heavy" for use on fabrics with finishes requiring more aggressive adhesion
TexPrint®TA/L	100 gsm basis weight	"Light" thermo-adhesive for use on fleece, etc.

TexPrint®TA Properties		
	TexPrint®TA/H	TexPrint®TA/L
Thickness	109µ / .0043"	129µ / .0051"
