

# TRIFECTA TEXTILE EMULSION

# Ulanano<sup>®</sup>

## TRIFECTA

**SBQ DUAL-CURE TEXTILE EMULSION; PRESENSITIZED FOR USE WITH WATER-BASED, PLASTISOL AND DISCHARGE INKS, NO SENSITIZER OR HARDENING NEEDED\***

**TRIFECTA** is a ready-to-use, extremely fast exposing and durable, violet-colored SBQ-dual cure direct emulsion for imprinted sportswear printing with water-based, discharge and plastisol inks, including post-phthalate formulations. Properly prepared, **TRIFECTA stencils do not require any sensitizers or hardeners to withstand the most aggressive textile inks on the market\***. All the **TRIFECTA** stencils require to obtain durability is sufficient UV-light for exposure and post-exposure.

**TRIFECTA** is formulated for compatibility with stationary and scanning CTS (computer-to-screen) exposure sources, including LED-based units. For maximum resolution and wider exposure latitude, yellow mesh usage is recommended with conventional exposure systems and with CTS exposure units.

**TRIFECTA** features fairly high viscosity (6500 centipoise at 25° C.) which provides good coating control, even on coarse mesh. Its high solids content facilitates fast drying, good buildup of EOM per coating stroke and, thus, good printed edge definition.

*\*In the rare cases, where 10,000 prints or more are required with aggressive inks, diazo or chemical hardening may be used.*

### FEATURES AT A GLANCE

- **Ultra-fast exposing**
  - Suitable for CTS exposure systems
  - Good wet strength, exposure latitude, and durability
- **High (≈43%) solids content**
  - Fast drying
  - Better mesh bridging for good printed edge definition
- **Easy wash-out**
  - Fast stencil through-put for high volume shops
  - Suitable for automatic washout units
- **High humidity resistance**
  - High durability, even during the summer season
- **Excellent solvent resistance**
  - Resists aggressive post-phthalate plastisols and most wash-up solvents
- **Easy reclaim**
  - Can be used in automatic reclaiming systems
  - Resists water-based and discharge inks, no sensitizer or hardening needed\*

The TRIFECTA for:

1. WATER-BASED INKS
2. DISCHARGE INKS
3. PLASTISOL INKS
