

ALBATROSS® ADHESIVES

ADHESIVES & ADHESIVE SPRAY EQUIPMENT

ALBATROSS®

Since 1898

Adhesive Solutions for Industry

Albatross offers a complete line of aerosol and bulk adhesives as well as adhesive equipment for multiple textile applications. From pallet adhesives for the screen printing, to pattern & marker adhesives for the apparel manufacturing, to backing/appliqué adhesives for embroidery, to foam rubber adhesives for the mattress and upholstery industries; Albatross has it all! Our assortment includes both solvent and water-based adhesives to provide the best product for the application.

AEROSOLS

HOLD TIGHT MIST ADHESIVE

HOLD-TIGHT sprays with a finely atomized mist pattern. The fine mist allows for even coverage on the sprayed surface. It is great for applying labels, photographs and other materials. May be used for permanent or temporary bonds. Use on paper, wood, cloth, foam, cardboard and film. Hold Tight does not contain any CFC's or chlorinated solvents.

Item No. 1077 - Net Weight: 13 oz.
Case Pack: 12

ALBATROSS DRI-WEB ADHESIVE SPRAY

Albatross Dri-Web sprays out in a "cob-web" type pattern. This allows for greater tack when bonding different materials. It is the best way to tack foam rubber and other porous materials. The web spray pattern is used in textile screen printing, furniture and upholstery manufacturing and other applications.

Item No. 1075 - Net Weight: 11.75 oz.
Case Pack: 12

EXPERT SUPER FLASH HEAT STABLE ADHESIVE SPRAY

Super Flash is a special adhesive that will withstand high temperatures without breaking down. It is great for screen printing where a flash cure is utilized. The heat resistant aerosol mist will not be affected by the flash. This specially formulated product maintains its integrity even under multiple flashes.

Item No. 1084 - Net Weight: 10 oz.
Case Pack: 12

EXPERT EMBROIDERY SPRAY ADHESIVE

A repositionable, clear color, non-staining adhesive, Expert Embroidery Spray Adhesive is perfect holding backing and appliques in-place. The special purpose adhesive will not transfer onto the needles. This avoids the "gumming" effect caused by standard adhesive sprays. It is perfect for all embroidery applications.

Item No. 1076 - Net Weight: 10 oz.
Case Pack: 12

BULK ADHESIVES

ALBATROSS SAFE-T-TACK PALLET ADHESIVE

Albatross Safe-T-Tack is a non-flammable, non-V.O.C. water-based adhesive. It provides a long lasting pressure sensitive tack for your screen printing pallets. Using Safe-T-Tack will keep your press, floors and personnel clean. Safe-T-Tack can be brushed or carded on the pallets, or when applied with the pneumatic Albatross APS System or PSB spray guns, Safe-T-Tack obtains immediate tack with no overspray. It may also be applied with the Albatross Roller Applicator.

Item No.	Container Size
1081	16 ft. oz. Container - Case Pack: 12
1082	1 Gallon Container - Case Pack: 4
1083	5 Gallon Pail
1085	55 Gallon Drum
5009	Roller Applicator (for 16 oz. container)

ALBATROSS BRUSH-TAC

A water-based pallet adhesive specifically designed for brush on application only. Albatross Brush-Tac has a greater viscosity than standard water-based adhesives for easier better controlled application. A quick dry time and long lasting tack makes Albatross Brush-Tac perfect for printers who do not wish to spray on pallet adhesive. It is non-flammable, non-VOC and non-toxic.

Item No.	Container Size
1095	Quart Container - Case Pack: 12
1096	Gallon Container - Case Pack: 4

ALBA FOAM TAC FABRIC & FOAM ADHESIVE

A water-based bulk adhesive specifically formulated for the mattress and furniture manufacturing industries. Alba Foam Tac, when applied through Albatross' pneumatic adhesive systems provides instant tack that is repositionable for the first few minutes before obtaining a permanent bond. Incredibly cost effective, Alba Foam Tac reduces adhesive costs by a minimum of 60% when compared to aerosol cans. It is non-flammable, non-toxic, non-VOC with no waste or disposal issues.

Item No.	Container Size
1095	Quart Container - Case Pack: 12
1096	Gallon Container - Case Pack: 4

EXPERT BULK-TACK (ALBATROSS AUTO-PAL)

A solvent based bulk adhesive for the screen print industry. Expert bulk tack can be applied with all electric spray systems including the Expert Little Pro 2400 Adhesive System or Expert AG3000 Adhesive Spray Gun. When applied through these systems, Expert Bulk Tack provides immediate tack that can be used for a variety of substrates. It is more cost effective than aerosol cans. Expert Bulk Tack is terrific for multiple station adhesive systems.

Item No.	Container Size
1078	1 Gallon Container - Case Pack: 4
1079	5 Gallon Pail
1080	55 Gallon Drum

ALBATROSS WISH ADHESIVE PALLET CLEANER

A non-toxic, non-hazardous liquid, Albatross WISH Adhesive Pallet Cleaner breaks up dried water-based adhesive pallet adhesives quickly, without the toxic odors normally associated with strong solvent cleaners. WISH is also great for cleaning adhesive spray equipment.

Item No.	Container Size
1101	1 Gallon Container - Case Pack: 4
1102	5 Gallon Pail

ALBATROSS APS BULK ADHESIVE ADAPTER

The Albatross APS (Adhesive Application System) Bulk Adhesive Applicator utilizes compressed air thru the Albatross PSN spray gun to apply fine mist of water-based adhesive with virtually NO overspray. By combining the adhesive with compressed air, the air/adhesive mixture obtains immediate tack. The Albatross PSN is an HLPV gun (which stands for high volume low pressure). This type of spray gun provides excellent atomization in a fan pattern, allowing the user to apply adhesive right to the edge of a screen printing pallet, foam rubber, or any substrate with almost no overspray. This system produces an improved spray from aerosol cans with no downtime. Flammability, toxicity, waste, disposal or environmental issues are eliminated using the APS System.

The APS System is self contained and portable. It holds a 5 gallon of adhesive, a pneumatic pump to bring the adhesive to the spray gun, and a gun hook to hold the sprayer when not in use. Simply roll the unit to the work area, "quick connect" an air line, and you're ready to go. The coiled nylon hoses provide 12 feet of working length. Attach the optional PSN Gun Hanger and suspend the sprayer over the work area for an even more convenient ergonomic working atmosphere.

The APS System is perfect for textile screen printers, mattress manufacturers, furniture manufacturers, or any industrial user wishing to save HUGE dollars on adhesive costs.

Item No.	Description
2034	Albatross APS Bulk Adhesive Applicator (includes 1 PSN Spray Gun)
2039	Albatross APS Dual Gun System (includes 2 PSN Spray Guns)
2029	PSN Add-On Package (makes a standard APS into a dual gun system)

ALBATROSS PSB CUP ADHESIVE SPRAY GUN

The Albatross PSB Cup Adhesive Spray Gun is a hand held pneumatic sprayer for applying water based adhesive. With an attached 16 ounce reservoir to hold adhesive, the PSB provides excellent mobility at a very reasonable price. Simply pour the adhesive into the bottle, attach to the spray gun, connect a compressed air line and you're ready to go.

Item No.	Description
2037	Albatross PSB Cup Spray Adhesive Gun

Shown above: Albatross PSN Adhesive Spray Gun (from the APS System) suspended with Albatross Gun Reel (#5001 optional) for efficient application.

EXPERT LITTLE PRO 460 ADHESIVE SYSTEM

The Expert Little Pro 460 Adhesive Spray System is an electric, airless, adhesive system for the application solvent based bulk adhesives. Expert Bulk Tack, when sprayed through this system, produces an instant, long lasting pressure sensitive tack. Great for textile screen printers and other industrial users. Because the Little Pro System is airless, it is perfect for multiple press screen printers wishing to have an integrated adhesive system throughout their facility. One Little Pro Pump can supply up to six sprayers which can be suspended over each press. The Little Pro can produce up to 3000 psi of pressure which when pushed through the spray guns creates superior tack with little or no overspray. The Little Pro comes complete with pump, high pressure hose, and spray gun. The system can be easily expanded to run additional presses as needed.

Item No.	Description
6701	Expert Little Pro 460 Adhesive System (includes: pump, hose, and sprayer)
6700	Little Pro Spray Gun Package (includes: Spray Gun with 50' hose)

EXPERT AG3000

The Expert AG3000 Electric Adhesive Spray Gun is great for manual textile screen printers who want to do away with aerosol cans but do not have compressed air available. The electric hand held spray gun applies Expert Bulk Tack solvent based adhesive on pallets obtaining immediate tack with little or no overspray. Simply pour the adhesive into the reservoir, plug into outlet, and you are ready to go!

Item No.	Description
2030	AG3000 Spray Gun (110-120V, 60 Hz.)
2031	AG3000 Spray Gun (220-240V, 60 Hz.)
