

The new Evolution precision cutter combines all the features and functions wide format printers and sign makers need. It's accurate, easy to use, and can mount onto your existing table.

The heavy duty cutter bar clamps materials securely. Using a standard utility blade, it cuts everything from inkjet media and vinyl, to rigid substrates like Sintra, Styrene and Gatorboard up to 1/2" thick.

The Evolution mounts directly onto your existing table or work surface. Adjustable levelers ensure straight and accurate cuts to within .008" over the entire length. The lift hold mechanism is operable from both sides. Available in five practical sizes from 64" to 144" and is backed by Foster Keencut's unprecedented 5 year general warranty on all parts (except blades) and a 20 year warranty on the bearings used in the cutting head.

Cuts up to 13mm

PVC Foamboard, Pop-up Banners, Foam Centered Board, Corrugated Plastics, Fabric & Textiles, Acrylic, Banner, and much more...

Item#	Cut Size	List Price
60190	64"	\$1,030
