

IMS Degreaser

Degreaser Products IMS102 / IMS103

ImageStar Degreaser products are designed as mesh pretreatments and wetting agents. These products are to be used before each mesh preparation. They remove oil, dirt and other contaminants from fabric prior to coating.

Processing Recommendations:

Apply to screen mesh prior to stencil application.

- Rinse mesh to a wet state and apply degreaser to the print side of the screen with a brush or pad.
- Use a circular motion to make sure the entire surface has been prepped. Repeat on squeegee side of screen, rinse thoroughly, and let dry in a drying cabinet or a dust free area to prevent contamination.
- **Mixing Instructions for IMS103 Degreaser Concentrate:** Mix 1 part **IMS103** into 20 parts water. To avoid foaming it is best to add **IMS103** into water, not water into **IMS103**. Mix to disperse the product evenly.

Product Highlights:

- **IMS102 RFU Degreaser**
This is a ready for use (RFU) product to be applied directly to the screen prior to stencil coating.
- **IMS103 Degreaser Concentrate**
The application of the product is the same as the RFU version with the added benefit that the concentrate is more economical to use.

Packaging:

- 1 Gallon
- 5 Gallon
- 55 Gallon
