

IMS Abrader / Degreaser

Abrader / Degreaser Products IMS104

ImageStar Abrader / Degreaser product is designed to clean and abrade the mesh surface prior to stencil coating. Abrading and degreasing the mesh prior to coating creates a better surface for emulsion and capillary film applications. This product is a one time treatment for new mesh prior to the first stencil coating. The degreasing action will eliminate any contamination the mesh encountered during storage.

Processing Recommendations:

- Rinse mesh to a wet state and apply degreaser to the print side of the screen with a brush or squirt bottle. Use a circular motion to make sure the entire surface has been prepped. Rinse thoroughly with a power washer, and let dry in a drying cabinet or a dust free area to prevent contamination.

Product Highlights:

IMS104 Abrader /Degreaser

This paste has a fine grit and a combination of degreasing and cleaning agents to abrade new mesh. The degreasing agent makes it a perfect product to be used as a final step prior to coating.

Packaging:

- 1 Gallon
- 5 Gallon
