

## IMS Graphic Screen Wash

### Graphic Screen Wash Products

IMS201 / IMS202 / IMS203 / IMS206 / IMS207C / IMS209C

*ImageStar* Graphic Screen Wash products are designed to be used after the screen is off the press to remove ink and color prior to reclaiming. These products have a blend of solvents and surfactants for use with solvent-based and ultraviolet (UV) inks. They are water friendly, and help to prevent ghost and ink haze.

### Processing Recommendations:

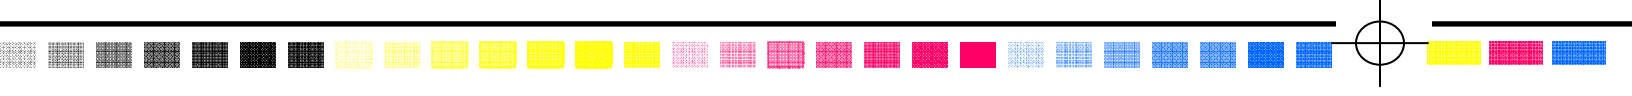

It is important to use these products after any fast evaporating press wash to re-wet the screen and allow the water to penetrate the ink residue.

- Remove all excess ink from the screen.
- Apply product to both sides of the screen with a brush, spray bottle, rag or by using the *ImageStar* Chemical Delivery Spray System.
- Power wash any residue and ink off the screen.
- The screen may now be stored or reclaimed using *ImageStar* stencil remover .
- If ink or ghost haze stains remain in the mesh, a second application of screen wash will sometimes remove stains and eliminate the need for ghost haze remover. If stains remain after a second application, ghost haze remover will be necessary for removal.

### Product Highlights:

- ***IMS201 Premium Graphic Screen Wash***  
Product is used for tough-to-remove inks such as polyester, epoxy, catalyzed and circuit board inks.
- ***IMS202 Universal Graphic Screen Wash***  
Product is used for mild solvent and UV
- ***IMS203 Economy Graphic Screen Wash***  
Product has a mild odor and works well with all UV and most solvent inks.
- ***IMS206 Graphic Auto Wash***  
Product is to be used in automatic in-line machines and with all UV inks. It can also be used in recirculation units or by hand.
