

IMS Ink Degradent

Ink Degradent Products IMS231 / IMS291

ImageStar Ink Degradent products are designed to be used as washes prior to reclaim or as ink haze removers after reclaim. These products keep the ink in a wet state and allow the ink residue to rinse from the screen with a high pressure rinse.

Processing Recommendations:

Apply to the screen during ink removal or after both ink and stencil have been removed.

- Apply to both sides of the screen with a brush, spray bottle, rag or by using the *ImageStar* Chemical Delivery Spray System.
- Brush or scrub these products into the screen to re-wet any dried ink left in the mesh, then power wash the ink and residue off the screen.
- If using these products prior to removing the stencil, a second application after stencil removal may be necessary to remove remaining ink stains.

Product Highlights:

- ***IMS231 SCR06 Ink Degradent***
To be used with plastisol inks and works extremely well as a mild haze remover after stencil is removed.
- ***IMS291 Premium Ink Degradent***
A very strong ink remover, mild haze or stain remover to be used with UV, solvent and plastisol inks.

Packaging:

- 1 Gallon
- 5 Gallon
- 55 Gallon
