

IMS Graphic Press Wash

Graphic Press Wash Products IMS301 / IMS304C / IMS305

ImageStar Graphic Press Wash products are designed to be used at press during color changes and down time. These products can be used with solvent and UV graphic inks.

Processing Recommendations:

ImageStar Graphic Press Wash products may be used in a plunger can, spray bottle, or directly from the container. These products are applied directly to the screen while still on press.

- Card out excess ink and apply generous amount of product to a clean, soft rag. Starting on the squeegee side, wipe screen until all ink residue and color are removed from the screen. Repeat steps on the print side of the screen.
- Use a dry clean rag to remove remaining residue. Screen may now be re-taped or fresh ink may be added to the screen.

Product Highlights:

- ***IMS301 Premium Graphic Press Wash***
A fast drying solvent blend designed for all UV and solvent based inks.
- ***IMS304C Spray & Wipe Graphic Wash***
A fast drying blend with a mild odor for all UV and some solvent based inks
- ***IMS305 Ultimate Graphic Press Wash***
Has a mild odor and works well with all UV and most solvent inks.
