

IMS Textile Press Wash

Textile Press Wash Products

IMS330 / IMS501 / IMS502 / IMS503 / IMS598

ImageStar Textile Press Wash products are designed to be used at press to clean ink during color changes and down time. These products evaporate quickly and can be used with all plastisol and plastisol-based inks.

Processing Recommendations:

ImageStar Textile Press Wash products may be used in a plunger can, spray bottle, or directly from the container. Apply these products directly to the screen while still on press.

- Card out excess ink and apply a generous amount of product to a clean soft rag. Starting on the squeegee side, wipe screen until all ink residue is gone. Repeat steps on the print side of the screen.
- Use a dry clean rag to remove remaining residue. The screen may now be re-taped or fresh ink may be added to the screen.

Product Highlights:

- ***IMS330 SCR21 Press Wipe***
A fast drying solvent blend press wipe for all plastisol and plastisol-based inks.
- ***IMS501 Premium Textile Press Wash***
A citrus-based product that works well on highly pigmented inks that can be difficult to break down after long production runs. Quick drying time makes this an ideal product for on the press cleaning.
- ***IMS502 Economy Textile Press Wash***
Economical, fast evaporating textile presses wash.
- ***IMS503 Textile Press Wash***
A mild odor, very aggressive product used with all plastisol, athletic textile, and catalyzed textile ink applications.
