

IMS Dye Sublimation Transfer Paper Tacky 95gsm

The ImageStar IMSP95T paper is designed for ink jet printed dye sublimation transfer applications, with a special low tack technology to help eliminate ghosting due to textile shifting. ImageStar Tacky Paper saves costs by reducing waste from poor printing and transferring, as well as lower ink usage. The special tacky technology adheres only in the printed areas, preventing damage to textile fibers in non-printed areas. Excellent stability with the 95 gsm paper weight helps prevent cockling and head strikes.

Features

- Special low tack activates only in ink areas
- Helps eliminate ghosting and blurring
- Handles heavy ink loads well – low cockling
- Competitively Priced
