KIWO Inc. Introduces Polycol® *Light-Scribe Ultra*

Industries latest emulsion technology optimized for all Computer-to-Screen (CTS) direct exposure systems

High resolution **Polycol® *Light-Scribe Ultra*** solves six common complaints:

1. High solids builds to target stencil thickness (EOM) with fewer coats
2. Smoother stencil surface (Rz value) prevents dot gain and bleeding
3. Smooth easy glide coating eliminates chatter and stringy drips
4. Tack-free surface provides friction-free printing, better peel and ink transfer
5. Anti-static component helps prevent ink wicking and spider webbing
6. High speed formulation reduces power requirement and extends head life
