

Lamination Tips

Why you need a Front Feeder & Rear Windup

- Enables a single operator to easily perform roll-to-roll lamination by loading a roll of prints on the front of the laminator, laminating it as it goes through, and rewinding it on the back
- Keeps your graphic running straight through the laminator every time
- Faster, worry-free roll to roll lamination equals faster production time
- Rewinding your prints saves valuable shop space
- Perfect for long runs and vehicle graphics. Rewinding the laminated media onto the rear roll will keep the graphic clean for mounting or installation on your customer's vehicle

LAMINATOR ACCESSORIES

Add these accessories to increase work flow in your print shop!

Designed for use with: Royal Sovereign 55" and 65" Cold Laminators
Royal Sovereign 65" Thermal Laminators

Front Feed Assembly

Attaches to the front of the laminator for feeding roll printed graphics, or storing a second roll of lamination film.

Rear Wind-Up Assembly

Motorized wind-up that attaches to the rear of the laminator for true roll to roll applications.
