

KIWO *ijet*²[™]

Advanced Computer-To-Screen Imaging System

The KIWO I-Jet ²™ is the impressive result of combining a decade of experience in Computer-To-Screen imaging with more than two decades of experience in systems integration of ink-jet technology.

Based on the same ink-jet technology used in the highly successful KIWO I-Jet™ we have introduced a host of new components and enhancements. The new KIWO I-Jet ²™ offers highest image quality, unsurpassed reliability, fastest imaging speed and unrivaled support systems.

The KIWO I-Jet ²™ is loaded with features making this system superior to any other competing CTS system!

The KIWO I-Jet ²™ is perfect for the smaller textile shop that makes only a few screens per day. It is equally suited for the industrial garment printer imaging hundreds of screens per shift or the medium format graphic printer.

The KIWO I-Jet ²™ is designed to fulfill all of the important requirements for the "mission-critical" role CTS plays in the production environment. User friendliness, system up-time and quick Return-On-Investment are just some areas where the systems excels.

The advanced software and hardware of the KIWO I-Jet ²™ along with a new semi-automatic imaging mode allow for the highest workflow efficiency. Equipment safety features ensure that the operator is protected and that the system fulfills the rigorous requirements of international industrial certifications.

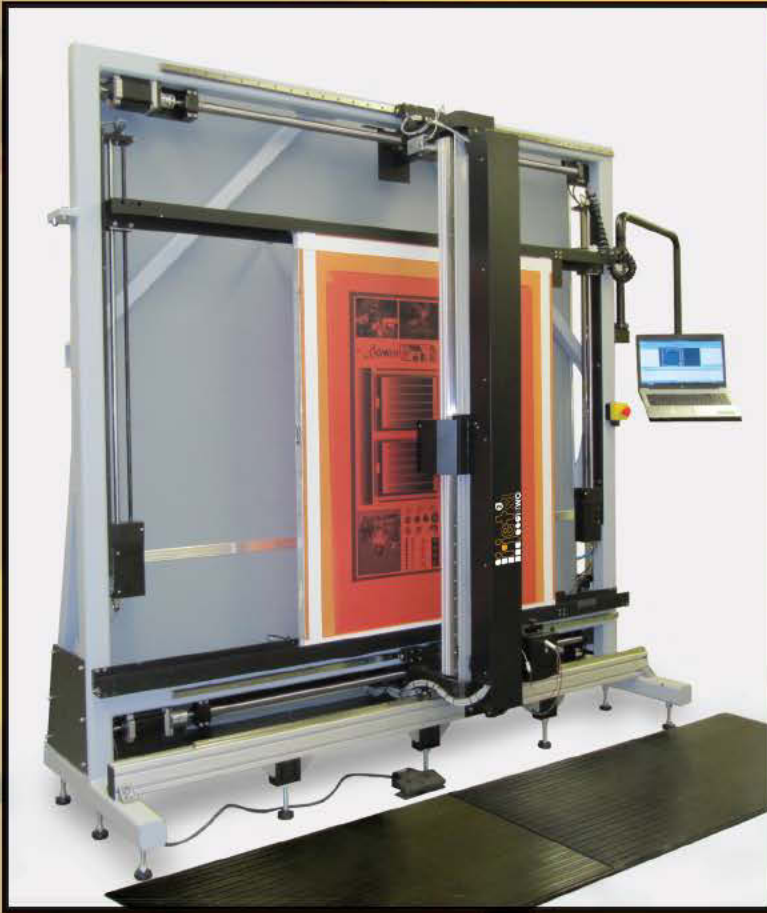

The KIWO I-Jet ²™ is complemented by a front-end package that leaves nothing to be desired and a support group that has the knowledge to smoothly integrate the system into production and to provide quick, reliable support when needed.

SPECIFICATIONS:	Model 2536	Model XL
Max Frame size	30"x 38"	48"x60"
Maximum Image size	24"x 32"	40"x50"
Max Frame Profile	1 5/8"	2 1/4"
Image resolution	500 / 600 / 700 dpi	
Imaging technology	Piezo 256 Nozzles - Wax	
Imaging speed	> 1 sqft / min	
Rip	Harlequin	
Computer Interface	Ethernet	
Data Format	TIFF	
Registration systems	Tri-Loc, Newman, MHM	
Power Supply	110 V / 10 AMP	
Compressed Air	6 bar / 100 psi / 0.1 gal/min	
Ambient Conditions	45%-75% RH, 60°-80°F	
Size (WxDxH)	54"x36"x79"	88"x32"x91"
Weight	800 lbs	950 lbs
